

Dear sir's, I subscribed to XM Radio in Dec.2004. I am a long distancetruck driver and I think XM Radio is the best innovation since the Declaration of Independence was signed.I use the services they provide every day.The programing they offer keeps me entertained and informed while away from home.The traffic and weather programming has been especially helpful to me. I pay for ALL of the services that XM provides and I think the government should not limit the services they provide just because the broadcasters are not doing the same job.
